# ACTIVITY MONITOR (S3)

Greater Visibility into Lawson User Activity

In the Cloud or On-premise

Flexible and Easy to Implement

Kinsey's Activity Monitor provides further insight into your Infor-Lawson S3 environment. By providing detailed queries of User session activity you can now monitor date and time sensitive transactions. All information is captured in real-time with no impact on system performance or use of transaction logs. Plus, with the addition of Kinsey's Transaction Auditing solution you can get detailed audit trails of exactly what data has been viewed or changed.
