

# SECURITY REPORTING (S3)

Enhanced Reporting for Greater Visibility

In the Cloud or On-premise

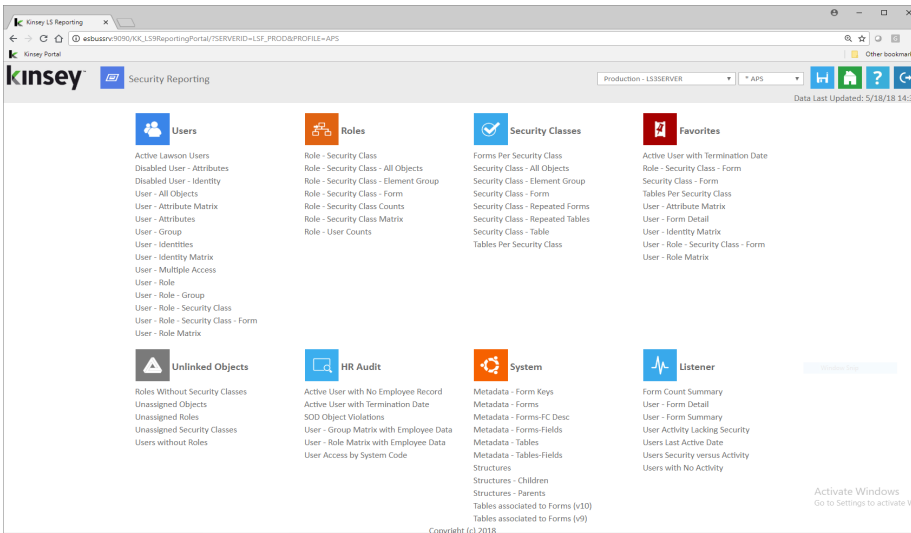

Kinsey's Security Reports extend the capabilities of Infor-Lawson's standard reports. By providing a commonly accepted interface, our reports make it simple and efficient to quickly review your security settings. You can easily transform your queries into reports or simply export your results to Microsoft Excel. This fast and easy approach has made this an invaluable tool when evaluating Lawson Security.

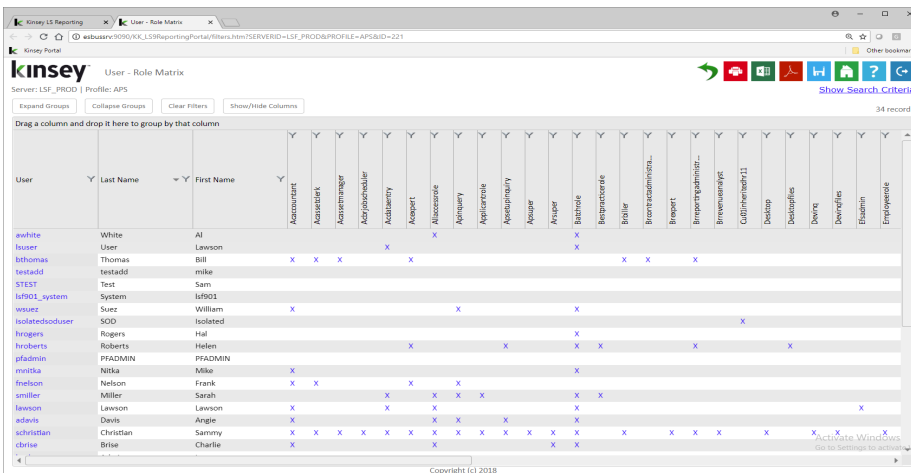

## Key Benefits

The Kinsey Security Reporting application comes with many robust features, including:

- User Reports
- Role Reports
- Security Class Reports
- Object Reports
- User/Role Matrix
- Role/Security Class Matrix
- Security Class/Object Matrix
- Object Comparison Reports
- Orphaned Object Reports
- Historical Reports
- Historical Comparisons
- MS Excel Export
- Print to PDF
- Print to Printer
- Support for I.E. and Chrome
- Scheduled Reports
- Unlimited Saved Reports
- Advanced Filtering
- Multilayered Grouping
- Profile Comparisons
- Multiple Environments
- Drill Around
- Flexible Search Options

## Powerful Reporting

"Finally.... a solution to our Lawson reporting needs! Kinsey's LS Reporting software has given us the ability to produce a variety of security reports. The software is easy to use, the reports can be customized to meet our specific requirements, and the customer service is amazing. Thanks Kinsey for a GREAT tool!" Deb Reeves, IT - Security Officer Martin Resource Management Corp
